Work Experience

Freelance

Full stack Developer

- I am currently a freelance full-stack developer, and I specialize in PHP. I work as a web and game developer, as well as a programmer. I create entire web applications and desktop apps, or whatever my employer requires of me.

- As a skilled programmer, I am proficient in several programming languages such as PHP, Python, JavaScript, C#, C++, C, and Java. My ultimate goal is to become a senior developer and to share my knowledge and expertise with junior developers to help them grow and excel in their careers.

- I believe that by sharing my knowledge and experiences with others, I can make a significant contribution to the field of programming and help build a community of skilled and knowledgeable developers. With my passion for technology and programming, I am excited to see what the future holds for this industry and am eager to continue learning and growing in my career.
